- Integration with **LID** allows improved analysis

Marketeer The integrated System for Fresh Produce Wholesalers

OneFit Marketeer is a specialised integrated computer system for fresh produce wholesalers. Based on practical procedures Marketeer incorporates the latest technology to cater for the modern environment with 24/7 use.

Examples of Uses

- Daily/Weekly Sales Invoices
- Split package control to ensure customer satisfaction
- Consignment Control to provide full traceability
- Profitability analysis at your fingertips
- Automated generation of *Intrastat* data
- Provide analysis of Waste Packaging
- Full Financial Accounts
- EPOS for sales from the warehouse (Optional)
- Wireless Handheld Units for the salesmen (Optional)

Goods In

In addition to the standard Goods In facilities, utilising the latest touch screen technology(optional), Marketeer Goods In module allows you to quickly and efficiently book goods in. With a built in QC function, you are able to record and control poor quality products as soon as they arrive on your premises.

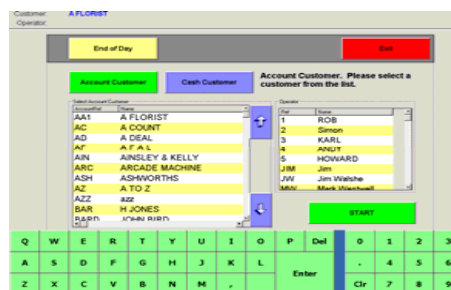

Handheld Sales - (Optional)

With live links to the Marketeer System, salesman have access to the RSP of each product, with protection of cost prices and selling below cost price

CashDesk- (Optional)

With live links to the Marketeer System, the cash desk operator has instant access to tickets that have just been created by the salesmen ensuring more accurate payment transactions. This also limits the sale of goods to customers who owe money. Warnings with credit limit and account balance information allows for payments to be accepted at this point, to resolve the situation.

Benefits

- Reduce Overheads and Improve Efficiency
- Full Traceability
- Control of Split Packages
- Detailed Profitability Analysis
- More Accurate Stock Control
- EDI links to automate order processing
- Integrated Cash Desk
- Integration to **OneFit** or third party Accounting
- Integration with **LID** allows improved analysis
- Bar Coding for fast, accurate data capture
